

Internship offer for Kragujevac University students

About Blucomfort

Blucomfort is an Italian software house and supplier of the Fiat Chrysler group. Since 2013 we have been working in Serbia to supply an HR management tool for the Kragujevac FAS vehicle plant which has subsequently been authorised as the official FIAT software to be implemented across the whole of Europe. We are looking to build on this existing relationship with Serbia and are searching for Serbian students to increase our development team.

We are experience extreme international growth (Italy, Poland, Mexico and Brazil) and we will require a new software development team to handle this growth. We will be creating a new office in Kragujevac in 2015 which will provide local opportunities for the best students after their studies are completed.

What we are looking for

Blucomfort is looking for software engineer interns to participate in a nine month internship in Vasto, Italy. The ideal applicants will have a strong understanding of development processes and excellent programming skills. Candidates must be able to develop and debug in either C# and/or Java. A passion for programming is necessary for success.

Requirements

- Currently pursuing a bachelor's or master's degree in computer science, computer engineering, mathematics, engineering or a similar field.
- Demonstrated programming experience (personal or professional).
- Experience developing and debugging C# and/or Java.
- Fluent English.

Pluses

- Familiarity with Microsoft Visual Studio.
- Knowledge of one or more of the following: HTML / jQuery / CSS / SQL

What we offer

We are offering a unique opportunity to join a small development team working for large multinational companies. The work you produce will be used by the clients and you will have the possibility to work on the front-end and back-end of our software. Due to the size of our development team, the work you produce will be influential in the development process and you will have the possibility to make real improvements to the software.

Full training and mentoring will be provided by our English Software Development Lead who will follow you throughout the entire internship.

The nine month internship will be in Vasto, Italy, with a wage of € 600.00 per month with accommodation included. There will be potential employment opportunities available in our future Kragujevac office for the best applicants when their studies are finished.
