# RETRACTED PAPER: SEVERAL THEOREMS OF APPROXIMATION THEORY FOR THE $q$-BESSEL TRANSFORM, KRAGUJEVAC J. MATH 21(2) (2027), 223–235

OTHMAN TYR[1] AND ABDELAALI DADES[2]

After careful review, the Editorial Board determined that the main results of the paper (Theorems 3.1 and 3.2) coincide with results published by Volosivets and Krotova in The Ramanujan Journal (2025), which has priority based on its earlier publication date. As the prior publication was not properly cited nor was its relationship to the present work clearly explained, the article has been retracted in accordance with publication ethics standards. Reference: S. Volosivets, Y. Krotova, *Direct and inverse approximation theorems connected with the q-Bessel Fourier transform in weighted $L^2$ space*, The Ramanujan Journal 66, 29 (2025).
