As part of EIT's (European Institute of Innovation and Technology) initiative to train 1 million people skilled in Deeptech by 2025, DEEPTECH 2M are running a weeklong online school as part of our pledge.

DEEPTECH 2M is a partnership between 5 universities (Ireland, Serbia, France, Greece and Spain) and three deep-tech entities with a vision to become the leading European initiative to empower innovators and entrepreneurs in Deeptech.

This online deeptech school is designed to introduce students, academics, non-academic and commercial people to deeptech. The school is five days long from 9am to 5pm CET. Additional reading material is also provided. For participants that complete the questions during the school and complete the additional reading requirements will receive a Certificate of Attendance.

The presentations are of Masters level and cover a wide range of topics including team development, 3D printing, energy and AI, which are given by both professional and academics.
