Tip of the Day:

If Fritzing is missing your special part and you don't want to build one by yourself, then use pinheaders as connectors and the grid to align them.

The image shows the 'Core Parts' menu in a game. The menu is organized into two main categories: 'CORE' and 'MINE'. The 'CORE' category is further divided into 'Basic' and 'Input'. The 'Basic' section displays icons for various electronic components such as resistors, capacitors, and integrated circuits. The 'Input' section displays icons for various input devices like buttons, joysticks, and sensors. The 'MINE' category contains icons for various mining tools and equipment like pickaxes, shovels, and drills. The interface includes a search bar at the top, a sidebar with navigation icons, and a list of items on the right.
